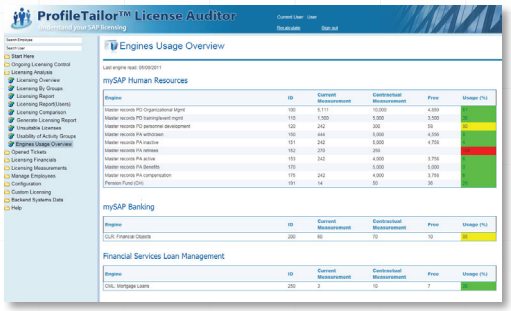
PROFILETAILOR™ LICENSEAUDITOR ENGINES

Take Control over SAP® Engine Usage

OPTIMIZE SAP ENGINES, BECOME EFFICIENT!

- ✓ Installed externally to SAP
- ✓ Provides clear view of engine possibilities for optimized models
- ✓ Detailed reports easily produced
- ✓ Available in both cloud and on-premises versions.



KNOW YOUR SAP ENGINES, AVOID HIDDEN COSTS ➤

The complexity of SAP software engines presents a valid challenge for enterprises in terms of compliance and resources. Many tend to forget that SAP licensing is not only based on license-per-user, but includes software engines as well.

The SAP engine licensing model applies various methods for measuring engine usage, which are based on the actual data created in the SAP system. This way SAP can charge for objects consumed by users – operating the system indirectly – such as pay slips and Internet sales.

ACHIEVE OPTIMIZED MODELS FOR SAP ENGINES ➤

In today's complex SAP environment, organizations seek a reliable tool for monitoring SAP engines. A member of Xpandion's ProfileTailor™ LicenseAuditor solution, LicenseAuditor Engines easily enables enterprises to assess their SAP engines, clearly understand which engines are actually being used and finally achieve best possible payment models, which are accurate and reflect the real usage of engines in the organization.

STAY IN CONTROL WITH AUTOMATED PROCESSES ➤

LicenseAuditor Engines uniquely delivers:

- Ability to define each active engine, its purpose and consumption
- Alerts before engine consumption is complete, for better licensing options
- Ability to document agreements per engine for later inspection
- Visual usage presentation of each engine and engine-group for identifying trends in engine usage and licensing

BE PREPARED FOR SAP AUDIT ➤

Leverage LicenseAuditor Engines to fully prepare your company for annual SAP licensing audits:

- Understand which SAP engines are really needed
- Identify the required usage threshold per engine
- Establish better negotiations with evident documentation
- Save valuable resources with continuous reports

Many organizations assume that engine-related costs are a fixed expense, whereas in reality SAP engine pricing can be optimized according to de-facto usage.
